## PROFILE INFO

In 2+ years of JavaScript experience. I'm passionate about creating seamless user experiences and believe that simplifying code leads to more agile applications. Possesses knowledge of HTML, CSS, JavaScript and JavaScript frameworks with ability to quickly learn new technologies. I adapt well to the business environment, always trying to develop myself and create revenue for the company. With the desire to become a Javascript master in the next 3 years and become a Senior Fullstack Developer in the 5-year roadmap.

## EXPERIENCE

■ **05/2022 - 03/2024**

Hitachi Digital Services, District 12, Ho Chi Minh City

### Front-end Developer

#### Logistic project

- Digitize the traditional operation by allowing end users to create and manage shipping transactions, request and confirm bookings from vendors. Provide a general but informative view of any specific transaction.
- I'm responsible for developing the website with ReactJS based on the old application's performance. During the development process, analyze and find hidden behaviors, report to the team lead and find solutions.
  - Role: Front-end developer
  - Team size: 40 members
  - Technologies:
    - Back-end: Java, Postgresql,...
    - Front-end: ReactJS framework, KendoUI, Bootstrap 4, React Router, Redux,...

#### Environmental project

- The system provides an intuitive environment for multidisciplinary certificate management, allowing evaluation and data storage on the blockchain platform.
- I'm responsible for developing features with backend using Nestjs framework, frontend using Reactjs framework and other technologies.
  - Role: Fullstack developer
  - Team size: 6 members
  - Technologies:
    - Back-end: Typescript, NestJS framework, Postgresql
    - Front-end: ReactJS framework, Materila UI, React Router
